

Gurram Varshitha

github.com/varshithagurram | varshithagurram05@gmail.com | Portfolio

SUMMARY

Analytical and results-driven Data Analyst with expertise in Python, SQL, and Machine Learning. Adept at transforming complex datasets into actionable business insights through Exploratory Data Analysis (EDA), predictive modeling, and data visualization using Tableau and Power BI. Proven ability to leverage GenAI and statistical methods to optimize data workflows, build interactive dashboards, and support data-informed strategic decision-making.

EDUCATION

Sri Venkateswara University

Tirupati, AP

Bachelor of Technology in Computer Science and Engineering (CGPA: 9.0)

Sep 2023 – May 2027

EXPERIENCE

Data Analytics Intern

May 2026 – July 2026

APSCHE Smart Bridge

- Executed ETL pipelines and Exploratory Data Analysis (EDA) on large-scale datasets using Python (Pandas) and SQL, improving overall data integrity and modeling readiness
- Designed interactive business intelligence dashboards to track core KPIs, translating statistical evaluations into actionable, data-driven strategies for cross-functional teams

Data Analyst Intern

May 2026 – July 2026

Soft Nexus

- Automated data cleaning and preprocessing workflows by 30% using Python (Pandas, NumPy), ensuring robust validation and transformation of complex datasets
- Generated dynamic visualizations and predictive reports utilizing SQL, Matplotlib, and Seaborn to uncover user behavior trends and deliver strategic stakeholder insights

PROJECTS

AI-Powered Resume-Job Market Intelligence System | Python, SQL, Power BI, Streamlit, NLP | *GitHub*

2026

- Built an end-to-end system that scores resume-to-job-description match quality using NLP-based text similarity, identifying missing and weak skills against target roles
- Engineered a job market analytics pipeline sourcing live postings via job board APIs to surface most in-demand skills, emerging skill trends, and common skill combinations by role
- Designed interactive Power BI dashboards and a Streamlit application to present match scores, recommended upskilling paths, and role-fit percentages across multiple career tracks

Customer Segmentation | Python, scikit-learn, Matplotlib, Tableau | *GitHub*

March 2026 – April 2026

- Investigated complex retail datasets to uncover hidden purchasing behaviors, deploying K-Means clustering algorithms to construct distinct, actionable demographic profiles
- Translated mathematical clustering outputs into intuitive data stories by designing interactive Tableau and Matplotlib dashboards that visually mapped segmented user behavior
- Synthesized these behavioral trends into strategic business insights, laying the analytical groundwork for targeted marketing campaigns aimed at maximizing customer retention

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Meta Data Analyst Professional Certificate

TECHNICAL SKILLS

Programming & Databases: Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), SQL (PostgreSQL, MySQL, CTEs, Window Functions)

Business Intelligence & Visualization: Tableau, Power BI, Advanced Excel

Statistical Analysis & Modeling: Exploratory Data Analysis, Predictive Modeling, A/B Testing, Regression Analysis, Customer Segmentation, Data Storytelling

Data Infrastructure & Tools: Google Cloud Platform, Git, GitHub, Jupyter Notebook, ETL Pipelines, Data Wrangling, Machine learning, NLP

CORE COMPETENCIES

Communication: Data storytelling for technical and non-technical audiences, stakeholder reporting, dashboard walkthroughs

Problem Solving: Root-cause analysis, hypothesis-driven investigation, translating ambiguous business questions into analytical solutions

Collaboration: Cross-functional teamwork, requirement gathering, working with engineering and business stakeholders

Delivery: Attention to detail, time management, documentation, adaptability to fast-changing requirements
